

**"I would be in my grave but for Dr. Miles' Heart Remedy"**

I could not walk across the house and the doctors I had told my husband I had consumption. A lady told me to try

**Dr. Miles' Heart Remedy**  
I sent and got \$5.00 worth and I got better. I weighed 115 pounds. I now weigh 150, and I owe my health to Dr. Miles' Remedies."

Mrs. Fred Wiltse,  
R. F. D. No. 13, Allen, Mich.

Most people who use Dr. Miles' Heart Remedy have the same experience Mrs. Wiltse had, they get better. A medicine that enables a weak heart to regain lost strength without depressing effects is the best to use.

The first bottle is guaranteed to benefit or your druggist gives back the price.

The condition of Mrs. Margaret Bandy shows no improvement, but she rather grows weaker and hopes for her recovery are slight.

Last week we stated that Tom Woody was bound to court for public drunkenness at or near Creston. We are in receipt of a letter from Mr. Woody in which he says: "There has been a lie published on me. . . . I have never been bound to court in my life." We made the mistake of stating that this man had been bound to court when the real facts, as we have since learned, are that he admitted his guilt and was fined \$2.00 and costs. When a person is bound to court that does not mean he has violated the law for he may not be guilty, but when he admits his guilt and is fined he certainly has violated the law. The writer feels that we used the softer side of the case in our first statement, but since Mr. Woody is dissatisfied we give the facts as we intended to do last week, but through a failure to properly understand, made the case lighter than it really is. Mr. Woody is welcome to the difference in the two statements.

Mrs. Eliza Smith, who has been paralyzed for several months, died at her home Saturday morning, with the second stroke of paralysis, which came on her April 6th, after which she never spoke again. Her suffering from that time until her death seemed to be very severe. She leaves three children, four brothers and a host of friends to mourn her loss. She has been a church member for many years and has lived a good Christian life from youth. Her age was 60 years, 3 months and 4 days. She was greatly loved by her neighbors and friends. The remains were buried near Dorton. Rev. Lon Burnett conducted the funeral services.

**SOME WAR ESTIMATES.**

It is estimated that the actual operating cost of the European war for eight months has been ten billions of dollars, and the property and other losses as much more. No human mind can grasp such enormous amounts, except in a comparative way.

When it is remembered that a modern warship costs, complete with armament, not less than ten millions of dollars, it will be seen that the loss in the war, both direct and indirect, has been enough to have built a fleet of 2,000 modern battleships. Can you grasp it now? Probably not, for very few of us have ever seen a modern battleship and can have little idea of the size and cost of a single such vessel.

Two games of ball were played on the Crossville diamond Tuesday and Wednesday with the Livingston boys. The first game stood 5 to 4 in favor of Crossville. The second game was 5 to 1 in favor of Crossville. Both games were hotly contested and were mainly pitchers' games, which reflected very favorably for Burnett and Rose. A social time was given in the rooms upstairs in the Potter building Tuesday night at which a very pleasant time was enjoyed by all. Saturday our boys played Harrison on the Harrison diamond and won a victory to the tune of 7 to 4. Our boys have played seven games thus far this season and have won each time. A game will be played on the home diamond today either with the Rockwood or Spring City team. A close game is expected.

Last week Prof. C. A. Mooers and W. H. McIntyre, of the State University, Knoxville, and Prof. Lyman Carrier, of the agricultural department, Washington, D. C., were here looking conditions over. It is the purpose of the department at Washington to begin a very thorough test of a large variety of grasses with the view to finding, if possible, some grass that will produce more range feed than our native grass does. The native grass is ample for the present number of cattle that feed on it and much more, but the department is looking to the time when the native grass will not be sufficient. These experiments doubtless will prove of great benefit to this section when carried to their final conclusion.

Dr. Lewis set the bone and Mr. Julian is getting on all right, except he has been almost worn out telling people what the matter is and how it happened. In order to save Mr. Julian from either murdering some one or going crazy answering questions, we are telling the people about it. If he can keep from doing something rash until after the Chronicle is issued all will be well for the people will soon understand after they get hold of the Chronicle this week.

Chas. Deatherage, Jr., who had his foot amputated in a Nashville hospital last week as the outcome of a fall from the T.
